

SD card Swissbit iShield

Software	1) Download and install the Swissbit Archive Tool.		
	2) Open Windows Explorer and insert the Swissbit SD card into your computer.		
	3) Select the SD card and format it in exFAT file format.		
Preparing	4) Open the Swissbit Archive Tool, select the Swissbit SD card and activate the card encryption.		
	5) Enter any pin for the card. You will then need this PIN to decrypt the SD card.		
	6) Now you can use the SD card in your DJI devices		
Process	7) Once the SD card is powerless, the data set is encrypted and can only be decrypted and viewed on a PC with the Swissbit Archive Tool. Even if the UAV is lost, the data is protected from unauthorized access.		
	8) Insert the SD card in your PC.		
View & Download	9) Start the Swissbit Archive Tool Now you can, after entering your pin, download the complete data set or display individual data.
